

# WINTER IS HERE

## Are your Pets warm this winter?

Now the cold weather has arrived your pets feel the cold exactly like we do so, its important that we make sure we have prepared and have things to keep the fur babies warm, happy and safe.

### HELPFUL TIPS

1. If your dog sleeps outside during the night try to provide a warm place away from drafts,

rain, early

morning frost and icy cold temps by providing a kennel, but remember the smaller the kennel the warmer your dog will be.

2. If your dog sleeps inside then a nice warm bed away from cold drafts will keep them snug and happy.

3. Pet wear is not only fashionable but it can also be lifesaving to your canine. There is waterproof ones to keep them dry outside and knitted ones for them inside the house too.

4. Your pet may seem a little more hungry like us in winter to keep warm but be

careful not to overfeed as this can affect their health, and always make

sure there is clean fresh water available at all times.

5. Pets suffer arthritis like us and it can be painful and make them feel unhappy. If you notice any signs of stiffness or reluctance to play or get out of bed, or take a little more time to get up then it might be a great idea to take them for a checkup at your local vet

Come in and see us have a chat to make sure you have everything you need.
